## Corporate Security: How to Avoid Getting Hacked, Secrets Stolen & Data Comprised

### Organizers

Jim Handlon, CEO, Bottomline Partners  
Mike Velotta, CEO, VCI Group

### Presenters

Daren Klum, CEO, CRAM  
Patrick Stump, President, Roka Security

### Presentation Overview

Protecting corporate data / information, avoiding getting hacked, securing company secrets, and keeping your Company's data safe from predators is one of the most active & important topics CEOs face today. Two nationally recognized executives fully engaged in using the latest corporate security tools, technologies, techniques & protection processes will lead our October CXO Forum discussions. You will be blown away with the powerful insights & action items spotlighted by our panel presenters on corporate security protection. Take-aways from this session will be priceless for CEO's understanding of what is needed to protect your data in today's world.

### Presentation Key Takeaways

1. What are hackers trying to do to get into your confidential data / information?
2. How should Companies try to protect their info / data?
3. What are the most vulnerable spots to be concerned about in protecting data?
4. What questions should CEOs be asking their staff & consultants about how their data / information & secrets are being protected?
5. What policies & practices need to be considered on protection of data / info?

### About Our Presenters

#### Daren Klum, CEO, CRAM

Daren Klum is a technology executive with an amazing record of creating game-changing technologies, building companies around cutting-edge innovations & successfully launching high-tech products to market.

Daren is CEO of CRAM Worldwide, Inc., a company he founded 3 years ago, pioneering a break-through digital security technology that prevents data piracy, makes hacking in the cloud impossible & leads day-to-day CRAM's vision, growth, build-out & future. Daren is recognized for leading startups, developing ground breaking technologies & building world-class teams. His first company, LiquidCool Solutions, was created around total liquid submersion cooling for electronic devices that reduce datacenter cooling costs by

40% and reducing physical footprint size by 60%. CRAM's exciting security platform is expected to play a critical role in making the world's data safe in a global market expected to grow to over \$120 billion by 2017. Prior to his entrepreneurial pursuits Daren spent over 17 years in Corporate America working for industry leaders like ABC / Disney, Gartner, Sprint, Time Warner Telecom and Digital River playing many roles that include software / computer engineering, sales, marketing, datacenter operations / datacenter design & executive management. Daren has earned degrees from Brown College in Broadcasting Communications and the University of Minnesota in Communications.

### Patrick Stump, President, Roka Security

Patrick Stump is the President and founder of Roka Security, a computer security company located in Northern Virginia. In his career, Patrick has worked for various entities in the security industry, including Lockheed Martin, Northrop Grumman, and highly specialized security companies including Vulnerability Research Labs.

Patrick has been a key player in both red-teaming and security operations with multiple branches and agencies of the United States Government (USG), the military and commercial industry. Patrick Stump's software development ranges from embedded low level assembly to high level application development in various software languages. Patrick's experience in Operations with the USG, as a Network Engineer and as an accomplished "professional" network attack simulator or penetration tester, has allowed him to develop a keen understanding of how advanced threats attack government and corporate networks, and how to defend against them. Patrick holds two Electrical Engineering degrees from Virginia Tech and University of West Virginia.
